from the preface my volume on the principles of sociology is described in the preface as an attempt to combine the principles of sociology in a coherent theory in plan and method the book is on the whole concrete rather than abstract consequently the theoretical propositions that it contains are scattered through many pages of descriptive and historical matter and are nowhere brought together in a didactic series it is therefore possible that not every reader of the volume has perceived the coherence of its theory and that classes using the book as a text have experienced a degree of difficulty in arranging its theoretical propositions in a consecutive order the theory assumes that certain adaptations of the individual to the physical world certain economic experiences ideas and activities and certain ethical experiences ideas and tendencies precede social life see the principles of sociology pp 41 45 100 103 239 the theory itself as distinguished from these presuppositions comprises the following propositions namely first certain affirmations about the modes of aggregation which bring

individuals that are more or less alike into contact and acquaintance second certain propositions about the more important modes of resemblance which may be observed in any aggregation of individuals third propositions about a consciousness of similarity or of kind which it is alleged is the true cause of social phenomena fourth propositions about the reactions of association and of the consciousness of kind upon individual motives conduct and character fifth propositions about the organization of the consciousness of kind into a social mind and about its expression in social purpose and control sixth propositions about the laws of social choice seventh propositions about the establishment of definite social relations and institutions by the social mind and eighth propositions about the persistence of social choices and institutions of these propositions the ones about the modes of resemblance and the consciousness of kind are of chief importance they contain or involve the entire theory

for many years students who took courses in social development had no text available for their use those of us who instructed them had to rely on assigning journal articles to be read and providing an overview and synthesis of the area in our lectures in the last few years the situation has changed markedly there are now several very good textbooks that fill the void reflecting an increasing interest in this area of research and theory here is one more there are many ways to tell a story our book we think tells it differently enough to have made it worth the writing as we began to talk some time ago about undertaking this project we found we had a mutual interest in trying to present the study of social development from a historical point of view the field has changed dramatically from its inception and we have both been in it long enough to have witnessed first hand a number of these changes modifications of theoretical orientations and the development of increasingly sophisticated and rigorous methodology have brought with them the stimulation of controversy and growth as

social developmental psychologists argued about the best ways of going about their business certainly the same things have happened in other areas of psychology but the arguments seem to have been particularly vigorous in our own domain
